

ServoArc Welding Positioner

PT-200s WELDING POSITIONER

ProArc

ServoArc Welding system – PT-200s

ProArc offers ServoArc series positioner that adopts SERVO MOTOR to achieve a “**more stable and accurate welding process**”. User can easily reproduce welding process, welding speed and current through intuitive HMI.

Compared to PT-100/200 series positioner, PT-200s stands out because it "**maintains flexibility and constant torque even the machine is under lower rotation speed**".

What are the benefits of using ServoArc PT-200s?

Easy to reproduction and maintain stable welding quality.

Allow unskilled welders to get consistent and precision weld.

Requires less maintenance and lower overall production costs.

CB-500 Smart Control

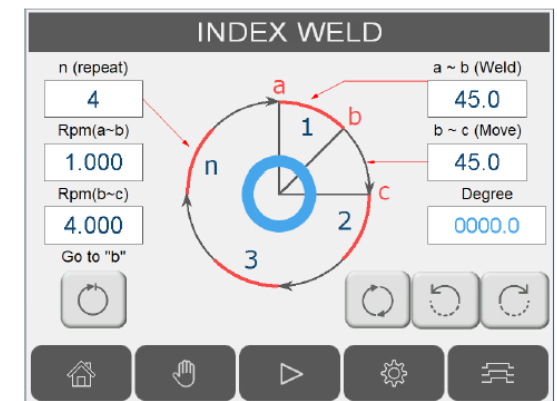

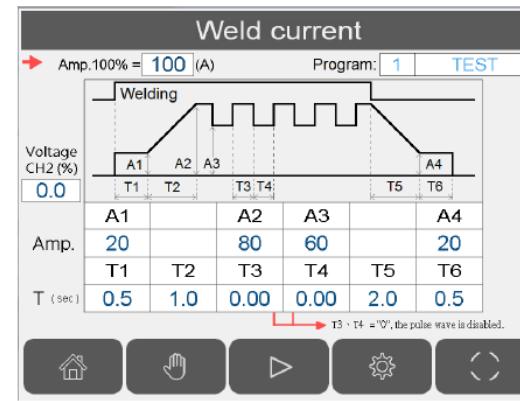

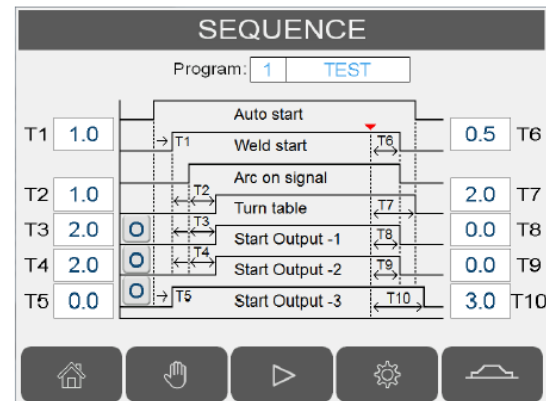

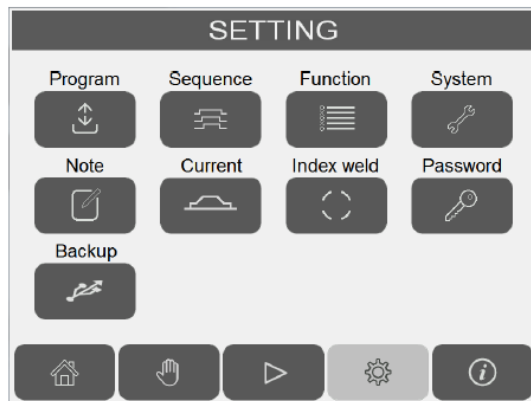

Save/ Load/ Back up 100 programs.

Allows to set up welding procedure with parameters.

Diagnosis function for easy trouble shooting.

Flexible Accessories

The system comes with various configuration modes, allowing flexible combinations based on specific requirements.

Find your welding solutions

Jaw chuck

- PG-150: OD 4 - 150mm
- PG-300: OD 4 - 300mm

WO-15

- ProArc WO-15 is suitable for MIG/MAG welding in heavy fabrication application.
- Comes with 4 adjustable parameters: **oscillation width/oscillation speed, dwell time on left & right**

Find your welding solutions

Torch Stand

- ProArc TS-145 and U type torch stand enable welders to have steady torch position
- Help to achieve repetitive welding tasks

TL-101

- ProArc TL-101 Pneumatic torch lifter enables the consistency and quality of welds
- Applicable in many welding processes, including plasma cutting, automation or robotic welding applications.
- With tilt range 30°

Find your welding solutions

WF-10

- ProArc WF-10 Wire Feeder is suitable for TIG and plasma welding.
- Equips with wire retraction function

SV-260

- SV-260 safety viewer protects eyes from sparks and harmful radiation under normal welding conditions.
